### **VM Module I Training**

A VM Module I training workshop was conducted in late August and early September by Dr. Mei-yung Leung. There were 9 professionals participating in the training workshop. They included project managers, structural engineers, quantity surveyors, contractors and academics from the governmental departments, consultant firms, contracting companies and university. They were divided into two groups for practising the VM knowledge in real construction projects. All participants successfully completed all tasks designed in the training workshop, obtained the VM Module I Certificates and are going to attend the assessment of the Associate Value Specialist by SAVE International. We are looking forward to seeing the new qualified VM facilitators in Hong Kong.
